DETAILED ACTION

Specification

The specification was received on 5/23/06. This specification is accepted.

Allowable Subject Matter

Claims 1-19 are allowed.

The following is an examiner's statement of reasons for allowance: While the prior art discloses multi-stage, multi-phase converters in which a controller disables the output stage when an over-current in the output stage is detected, the prior art does not disclose or suggest a controller sensing the phase currents of each of the phase processing units of the DC/DC converter and controlling the power supplying unit so as to interrupt the DC power supply.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fritz (US 6,218,816) and Sides (US 5,712,754) disclose converter over-current protection strategies.
